

## CREATE A CLAY LADY BEETLE

## What you'll need:

- Modelling clay
- Any tool that can be used for cutting up clay (like a butter knife) - but ask mum or dad first!

## QUESTIONS

What colour lady beetle did you make?

Was the clay easy or difficult to roll?

What other animals could you make with clay?

## RESOURCES

Need help? Contact our team: [hello@pinotandpicasso.com.au](mailto:hello@pinotandpicasso.com.au) and one of our instructors will get in touch with you!

**STEP 1**

Take out your black, red and white clay.

**STEP 4**

Break off another very small piece of black and separate this into 4 tiny balls.

**STEP 8**

Cut a line down the middle of your red clay (but not all the way!), to create wings.

**STEP 9**

Place two small black balls on either side of the line you just cut.

**STEP 12**

Feel free to make whatever colour lady beetles you want! Here are just a couple of colours you can use.

**STEP 2**

Break the red clay in half and roll it into a ball.

**STEP 3**

Break the black clay in half, then half again (so you have one quarter), and roll it into a ball. Cut this in half so you have half of a sphere.

**STEP 6**

Squish the red ball down so it becomes a little bit flatter. You can use your hand or whatever tool you have.

**STEP 7**

Connect your black half ball and squished down red ball. This will form the head and body.

**STEP 10**

Roll up too very small balls of white (About the same size of the smallest black balls you just used) and too smaller balls of black (about a fifth of the size of the white balls).

**STEP 11**

Place these down (black on top of the white) on the head of your lady beetle.
